

AISHWARYA TIWARI

DATA ANALYST & GO-TO-MARKET (GTM) ENGINEER

+91 9399435607 • aishwaryatiwari274@gmail.com • Hyderabad, Telangana • linkedin.com/in/aishwarya-tiwari-67422b147

PROFESSIONAL SUMMARY

Results-driven Data Analyst and GTM Engineer with experience in data cleaning, transformation, dashboard development, ETL automation, event tracking instrumentation, and business reporting across freelance and corporate environments. Skilled in Python, SQL, Tableau, Google Tag Manager (GTM), Clay.com, and CRM integrations. Proven ability to automate data pipelines, enrich lead data, run statistical significance tests, and deliver insights that support business growth and operational decision-making.

CORE SKILLS

Tools & Languages: Python, SQL, Tableau, Power BI, Pandas, NumPy, Microsoft Excel

GTM Operations: Google Tag Manager (GTM), Clay.com, Webhooks, HubSpot/Salesforce Integration, Lead Scoring, RevOps

Analysis & Statistics: Data Analysis, A/B Testing, Z-Tests, P-Value Analytics, Hypothesis Testing, Regression Analysis

Data Engineering: ETL Pipelines, Data Quality Assurance, Data Cleaning, Validation, Preprocessing

Business Intelligence: Dashboard Development, Data Visualization, Reporting Automation, Analytics Insights

PROFESSIONAL EXPERIENCE

Freelance Data Analyst & GTM Developer

Jan 2024 – Present

Self-Employed | Hyderabad, India

- Developed interactive BI dashboards and business reports using Tableau and Power BI, translating stakeholder requirements into actionable visual solutions.
- Cleaned, profiled, and validated complex datasets to ensure database accuracy and reporting quality, improving catalog governance by 30%.
- Programmed automated ETL pipelines using Python and SQL to streamline reporting and schedule data transformations.
- Instrumented Google Tag Manager tags, Custom JS variables, and lead enrichment integrations (Clay.com) to synchronize visitor conversions directly into CRM pipelines.

Test Engineer (Data Quality)

Mar 2022 – Sep 2023

Corporate Analytics Environment | Indore, India

- Performed rigorous data cleaning, transformation, and validation processes that improved product database data quality by 30%.
- Conducted A/B testing and statistical significance evaluations for conversion features, identifying improvements that boosted signup-to-paid conversion rates by 15%.
- Designed interactive, real-time Tableau dashboards to monitor operational metrics and support key business decision-making.
- Automated recurring data quality and ingestion reports using Python scripts and SQL queries, reducing manual analysis effort by 40%.
- Collaborated with cross-functional development teams in the United States and China to ensure data pipeline consistency and sync accuracy.

Assistant System Engineer

Sep 2021 – Mar 2022

Technology Solutions Firm | Gurgaon, India

- Assisted with engineering data documentation, system health reporting, and issue tracking.
- Analyzed technical system issues, documented resolutions, and improved technical support workflows.

SELECTED PROJECTS

GTM Pipeline & Clay Enrichment Simulator (A/B Test Sandbox)
Google Tag Manager, Clay.com, HubSpot API, Python, SQL/dbt, JavaScript

- Created a live web sandbox demonstrating frontend event tracking triggers, GTM macro variables, and webhook payloads.
- Built a mock enrichment flow using Clay.com APIs to scrape LinkedIn profile details and company size from email domains.
- Coded a Z-test statistical significance engine in JS that calculates conversion lift and p-values based on variant inputs.

Live Project

Sales Performance & Trend Analysis
Python, Tableau, A/B Testing

- Analyzed regional sales datasets to support recommendations that improved sales performance by 10%.

Academic

Healthcare Data Prediction
Python, SQL, Machine Learning

- Queried, cleaned, and processed clinical data from relational databases to support model training and exploratory analysis.

Academic

EDUCATION

Bachelor of Engineering
Samrat Ashok Technological Institute | India

Graduated: 2019

SELECTED CERTIFICATIONS

- Google Data Analytics Specialization
 - Generative AI Prompt Engineering
 - Data Through the Art of Visualization
- ChatGPT Advanced Data Analysis
 - Data Analysis with R Programming
 - Introduction to SQL (Coursera)
